

TDK-Lambda

Product Highlights

- Constant current / constant voltage charging
- 300W model features convection cooled, fanless design
- Voltage ratings for 12, 24 and 48V storage systems
- Dedicated backflow prevention module (EVS-RP) available

Key Specifications

- 300W open pcb type / 600W enclosed unit type
- CV mode voltages 18V(300Wonly), 36V and 57Vdc
- CC mode currents 16.7/8.4/5.3A(300W)/16.7/10.6A(600W)
- 5 year warranty

Typical Applications

- Charging various types of storage media including: Lithium Ion, Nickel Hydride and Lead Acid batteries
- Constant current applications such as electrolysis
- LED lighting and display systems
